Miamoo only recommends Lansinoh HPA® Lanolin for use in baby products. Some grades of medical lanolin may produce an allergic reaction, due to the levels of free lanolin alcohols present. However, the unique process used to refine Lansinoh HPA® Lanolin means that the free lanolin alcohol proportion is reduced to such an extent as to eliminate the risk of reactions. The safety and purity of Lansinoh HPA® Lanolin is unmatched in any other lanolin product.
